Member of the European Parliament

European Parliament

[MEP's Office Address]

[City, Postal Code]

Dear [MEP's Name],

I hope this message finds you well. I am writing to follow up on a recent [request](#) made by civil society UAP organizations urging the European Union to take action regarding Unidentified Anomalous Phenomena (UAP).

As a concerned citizen, I respectfully ask you to consider the serious implications of this issue and to support initiatives for UAP investigation and research within the European Parliament.

UAP have been reported worldwide by credible witnesses, including military personnel, pilots, and scientists, as well as citizens, and continue to pose potential risks to aviation safety and national security, particularly near sensitive sites such as military and nuclear installations.

Furthermore, UAP represent a significant opportunity for scientific research and innovation in fields such as advanced physics, energy, and transportation.

In recent years nations like the United States, Canada, China, Russia and Japan have taken steps to address UAP, therefore I strongly feel the European Union can not lag behind.

I kindly ask that you consider the following actions in your capacity as a MEP:

1. **Support the establishment of a process for collecting, analyzing, and sharing UAP data across the EU**, ensuring transparency and scientific rigor in the investigation of UAP.
2. **Advocate for the inclusion of UAP in EU policies and legislation** related to aviation safety, security, and space, with a focus on establishing protocols for reporting and addressing UAP sightings.
3. **Champion funding for UAP research and innovation** under EU programs like Horizon Europe, to explore the many scientific, technological, and societal implications of UAP.
4. **Promote international collaboration and information exchange on UAP**, especially with countries like the US, who have already initiated UAP-related government activities.

By taking these actions, the European Parliament can ensure that the EU is proactively addressing this complex and transboundary phenomenon, safeguarding public safety, advancing scientific discovery, and fostering technological innovation.

Thank you for your attention to this issue. I trust that, with your leadership, the EU can take the necessary steps to address UAP with the seriousness and scientific rigor it deserves.

I look forward to hearing your thoughts on this important issue and would greatly appreciate your commitment to championing these initiatives within the European Parliament. Please feel free to contact me if you need further information or would like to discuss this matter further.

Yours sincerely,

[Your Name]
